SUMMARY

Full Stack AI Engineer with 4+ years of experience building responsive, high-performance, and user-friendly web applications. Proficient in Next.js, React.js, TypeScript, Node.js APIs, Web3 and AI/LLM integrations. Experienced in developing chatbots, automation tools, and integrating OpenAI/LLM APIs for intelligent features. Built Instagram/TikTok automation systems and developed production platforms that serving thousands of users.

EXPERIENCES

Decrypted Labs | Full Stack Engineer

Jun 2024 - Present

- Developed **Decrypted Labs website** using **Next.js + WordPress Headless CMS (GraphQL)**, enabling SEO-friendly server-side rendering and content management.
- Built **IAMDIVINITY**, serving 3K+ users, with optimized data-heavy tables, portfolio dashboards, and smooth UI/UX.
- Designed **custom animations** (Framer Motion, GSAP) for landing pages and dashboards, ensuring performance and accessibility.
- Improved **page speed & SEO up to 100%** through server-side rendering, image optimization, and caching.
- Improved **frontend performance** by minimizing re-renders, applying SSR with Next.js, and optimizing state management (Redux Toolkit + RTK Query).
- Built AI-powered chatbot using OpenRouter API with authentication, conversation history, and custom UI matching ChatGPT functionality.
- Developed social media automation tool with scheduling, media management, and cadence-based posting using cron jobs and MongoDB.
- Created Cruise Booking System with Stripe webhooks, referral/promo code engine, MongoDB aggregation pipelines, and automated bonus distribution via cron jobs.

Ecommerce Inside

July 2022 – Jun 2024

MERN Stack Engineer

- Developed **responsive websites** using React.js, Tailwind, and Bootstrap, ensuring cross-browser compatibility.
- Created **Express.js APIs (MVC)** with MongoDB to support frontend features and improve data handling.
- Debugged complex **UI/UX issues** and optimized frontend for faster rendering across different devices.

PROJECTS

- Penthian (RWA Platform):** Built animated landing page (Framer Motion), auctions, listings, and investor features. penthian.com
- Rock Paper Scissors Blockchain Game:** Real-time multiplayer Web3 game with smart contracts, commit-reveal protocol, and automated settlement on Sepolia testnet. officialrps.com
- Crypto on Discount:** Web3 platform integrating USDC staking & smart contracts with sleek Next.js UI. cryptoondiscount.com
- Degen Forest:** Modern responsive landing page with clean UI/UX. degenforest.com

SKILLS

- Frontend Development:** HTML, CSS, JavaScript, TypeScript, Responsive Design, Web Accessibility
- Frameworks & Libraries:** Next.js, React.js, Tailwind CSS, Nest.js (familiar), Shadcn UI, Material UI, Redux Toolkit, RTK Query, Tankstack Query (React Query)
- Backend & Blockchain & Database:** Express.js, Python, Flask, MongoDB, Postgres, AI/LLM
- Build Tools:** Babel, Webpack, NPM
- APIs & Integration:** RESTful APIs, GraphQL, SOAP APIs, Web3 Integration, AI APIs (OpenAI, Telegram bots, Google APIs, YouTube APIs), WordPress Headless CMS with GraphQL
- Version Control:** Git, GitHub, GitLab, Bitbucket
- Testing:** Unit Testing, Cypress, Jest
- Additional Skills:** Teamwork, Time Management, Strong Interpersonal Skills, AI Agents, Web3, Shopify & WordPress

EDUCATION

Virtual University of Pakistan

Bachelor of Science in Computer Science (Online Program) | In Progress (Expected Completion: 2028)

- Continuing studies through a flexible online degree while working full-time as a Software Engineer.
- Balancing academic learning with 4+ years of professional experience in modern web development.
